XtractMor Partners with the Atlanta Hustle of the American Ultimate Disc League (AUDL)

XtractMor plans to use its continued partnership with the Atlanta Hustle of the AUDL for the 2023 season to promote its equipment for brewery and related industries. The Hustle's June 10 match will be broadcast on Fox Sports 2 as the AUDL Game of the Week.

(Rome, GA) [XtractMor](#) of Rome, GA announced today that it is continuing its official partnership with the [Atlanta Hustle](#) of the American Ultimate Disc League ([AUDL](#)) to promote its ShockWave Xtractor (Xtractor) cavitation technology for brewery, winery and distillery applications. The partnership is for the entire 2023 season, running April through August. Games can be watched live on the AUDL Network, [AUDL.tv](#), and an AUDL “[Game of the Week](#)” is rebroadcast each week on Fox Sports 2. The Hustle’s June 10, 2023, match against the New York Empire will be featured on national TV, airing live on the AUDL network at 7:00 PM EST on game day and replaying within 24 hours on Fox Sports 2.

The Hustle continue to call Silverbacks Park home for the upcoming season, and will be playing in their home opener against the Indianapolis AlleyCats on Saturday, April 29, 2023, at 7:30 p.m. The XtractMor logo will be visible on a sideline banner at midfield during the game and is also featured on the team website.

“Our device [the ShockWave Xtractor] also uses a specialized spinning disc to create cavitation, so the partnership works on many levels.” said Doug Mancosky, CEO of XtractMor. “XtractMor’s partnership with the Hustle allow us to be part of an exciting professional sport that’s growing rapidly growing in popularity.”

The Xtractor harnesses the pressure fluctuations of cavitation to improve extraction. The Xtractor can allow brewers to produce bitter beers with up to 50% less bittering or dry hops, as well as improve the extraction of fruits, coffee and other flavors. The Xtractor can also increase production through faster dry hopping and increase beer yield by producing less beer-soaked hop waste. For distilleries and wineries, the Xtractor can significantly accelerate and catalyze aging, allowing flavor transitions that often take years to develop to happen in minutes.

About XtractMor

XtractMor is a wholly owned subsidiary of Hydro Dynamics, Inc. (HDI) and the exclusive marketer of HDI’s ShockWave Xtractor (Xtractor) for brewery, winery and distillery applications. HDI is also located in Rome, Georgia and is the developer and manufacturer of the cavitation based Xtractor technology. The Xtractor uses the physical phenomenon of cavitation, normally known as a destructive force, and harnesses it to solve critical industrial mixing, extraction and heating problems. The technology can now be found on five continents in applications ranging from biodiesel production to hops extraction for beer. Learn more at: www.xtractmor.com or www.hydrodynamics.com.
